PATIENT INFORMED CONSENT

PATIENT NAME:	DATE:	
To the patient: please read this entire document prior to signing it. It is important that you understand the information contained in this document. Please ask questions before you sing if there is anything that is unclear.		
you. I may use my hands or a mechanical ir	nstrument upon your body in	ipulative therapy. I will use that procedure to treat such a way as to move your joints. That may cause u "crack" your knuckles. You may feel a sense of
Analysis / Examination / Treatment: As a part of the analysis, examination and treatment you are consenting to the following procedures:		
 □ spinal manipulative therapy □ range of motion testing □ muscle strength testing □ ultrasound □ laser / light therapy □ Other (please explain) 	 □ palpation □ orthopedic testing □ postural analysis □ hot/cold therapy □ massage 	 ☑ vital signs ☑ basic neurological testing ☑ EMS ☑ radiographic studies ☑ rehabilitative exercises
The material risks inherent in chiropractic adjustment: As with any healthcare procedure, there are certain complications which may arise during chiropractic manipulation and therapy. These complications include but are not limited to: fractures, disc injuries, dislocations, muscle strain, cervical myelopathy, costovertebral strains and separations and burns. Some types of manipulation of the neck have been associated with injuries to the arteries in the neck leading to or contributing to serious complications including stroke. Some patients will feel some stiffness and soreness following the first few days of treatment. I will make every reasonable effort during the examination to screen for contraindications to care; however, if you have a condition that would otherwise not come to my attention, it is your responsibility to inform me.		
the taking of your history and during exami	ination and X-ray. Stroke has and are estimated to occur b	ing weakness of the bone which I check for during s been the subject of tremendous disagreement. The retween one in one million and one in five million red as rare.
he availability and nature of other treatment options: Other treatment options for you condition may include: • Self administered, over the counter analgesics and rest. • Medical care and prescription drugs such as anti-inflammatory, muscle relaxants and pain killers. • Hospitalization. • Surgery. If you chose to use one of the above noted "other treatment" options, you should be aware that there are risks and benefits of such options and you may wish to discuss these with your primary medical physician.		
The risks and dangers attendant to remaining untreated: Remaining untreated may allow the formation of adhesions and reduce mobility which may set up a pain reaction further reducing mobility. Over time this process may complicate treatment making it more difficult and less effective the longer it is postponed.		
DO NOT SIGN UNTIL YOU HAVE READ AND UNDERSTAND THE ABOVE. PLEASE CHECK THE APPROPRIATE BLOCK AND SIGN BELOW.		
☐ I have read or ☐ have had read to me the above ☐ I have discussed the procedure and associated risatisfaction. Doctor: Patient: _	isks with <i>Dr. Milaka Stringi</i>	
By signing below I state that I have weighed the risks involved in undergoing treatment and have decided that it is in my best interest to undergo the treatment recommended. Having been informed of the procedure, associated risks and having had all my questions answered to my satisfaction, I hereby give my consent to that treatment.
